The Role of the European Union as a Key Export Market for US Products

May, 2006

This document provides a summary of publicly available data from the Office of Trade and Industry Information (OTII), Manufacturing and Services, International Trade Administration, U.S. Department of Commerce export data base (www.esa.export.gov). The analysis includes exports to the 25 European Union countries and includes states that are in the top tier of export states to the European Union as well as other states that have expressed an interest in the implications of the European Union's Registration, Evaluation and Authorization of Chemicals (REACH) proposal. The analysis also contains information on each state's exports to other world markets. The importance of some markets, such as Asian ones, is also shown by the data. Please note that this overview provides just a snapshot of exports to the European Union and the data do not provide detailed information on which products were sent, whether they simply passed through the European Union en route to another destination, etc.

US Exports to the European Union

Total Percentage of Exports to the European Union – 20.6%

2005 Exports of TOTAL to European Union 25 (EU 25)

Total Exports to the European Union 25 from US States - numbers are in thousands (\$ USD)
